(iii) 105.1.1.3 Notification of hazardous activities. When a permit is not required to engage in any hazardous activity set forth in the appendix to this rule, the person intending to engage in the hazardous activity shall first notify the local fire code official of that person's intent to engage in that hazardous activity.

(b) 105.1.2 Types of permits.

(i) Operational permit. An operational permit allows the applicant to conduct an operation or a business for which a permit is to be issued for either:

(a) A prescribed period.

(b) Until renewed or revoked.

(c) 105.2.3 Time limitation of application. An application for a permit for any proposed work or operation shall be deemed to have been abandoned six months after the date of filing, unless such application has been diligently prosecuted or a permit shall have been issued; except that the fire code official is authorized to grant one or more extensions of time for additional periods not exceeding 90 days each if there is reasonable cause.

(d) 105.2.4 Action on application. The fire code official shall examine or cause to be examined applications for permits and amendments thereto within a reasonable time after filing. If the application or the construction documents do not conform to the requirements of pertinent laws, the fire code official shall reject such application in writing, stating the reasons therefore. (3) 105.3 Conditions of a permit. A permit shall constitute permission to maintain, store or handle materials; or to conduct processes which produce conditions hazardous to life or property; or to install equipment utilized in connection with such activities; or to install or modify any fire protection system or equipment or any other construction, equipment installation or modification in accordance with the provisions of this code where a permit is issued. (a) 105.3.1 Expiration. An operational permit, when issued, shall remain in effect until reissued, renewed, or revoked or for such a period of time as specified in the permit. Construction permits, when issued, shall automatically become invalid unless the work authorized by such permit is commenced within 180 days after its issuance, or if the work authorized by such permit is suspended or abandoned for a period of 180 days after the time the work is commenced. Before such work recommences, a new permit shall be first obtained and the fee to recommence work, if any, shall be one-half the amount required for a new permit, when issued, for such work, provided no changes have been made or will be made in the original construction documents for such work, and provided further that such suspension or abandonment has not exceeded one year. and any change in occupancy, operation, tenancy or ownership shall require that a new permit be issued.

- (b) 105.3.2 Extensions. A permittee holding an unexpired permit shall have the right to apply for an extension of the time within which the permittee will commence work under that permit when work is unable to be commenced within the time required by this paragraph for good and satisfactory reasons. The fire code official is authorized to grant, in writing, one or more extensions of the time period of a permit for periods of not more than 90 days each. Such extensions shall be requested by the permit holder in writing and justifiable cause demonstrated.
- (c) 105.3.3 Occupancy. Prior to the issuance by the building official of any certificate of occupancy for any building subject to paragraph (D)(2)(a)(104.2.1) of this rule, the responsible person shall notify the fire code official to be present to witness the acceptance testing of all fire protection systems. Prior to the issuance by the building official of any certificate of occupancy for any building subject to paragraph (D)(2)(a)(104.2.1) of this rule, the responsible person shall notify the fire code official to conduct a final inspection. The fire code official shall report any deficiencies of the fire protection systems to the building official. No structure or building, or any portion thereof, shall be occupied unless:
- (i) 105.3.3.1. Such structures or buildings or portions thereof are in substantial compliance with the applicable provisions of this code and the building code as listed in rule 1301:7-7-45 of the Administrative Code; or
- (ii) 105.3.3.2. The structure or building, or any portion thereof, does not constitute a distinct hazard to life and property in accordance with the provisions of this code.
- (d) 105.3.4 Conditional approvals and permits. Where approval by the fire code official or permits are required and upon the request of the applicant, the fire code official is authorized to issue a conditional approval or permit to engage in the permitted activity or use provided that the permitted activity or use is safe and does not endanger life or public welfare. The fire code official shall notify the applicant of any limitations or restrictions necessary to keep the regulated activity or use safe. The holder of a conditional approval or permit shall proceed only to the point for which approval has been given, at the applicant's own risk and without assurance that approval for the occupancy or the utilization of the entire premises, equipment or operations will be granted.

Note: for copyright claim information, please see the notice on the last page of this rule.

- (e) 105.3.5 Posting the permit. Issued permits shall be kept on the premises designated therein at all times and shall be readily available for inspection by the fire code official.
- (f) 105.3.6 Compliance with code. The issuance or granting of a permit shall not be construed to be a permit for, or an approval of, any violation of any of the provisions of this code or any other ordinance of the jurisdiction. Permits presuming to give authority to violate or cancel the provisions of this code or other ordinances of the jurisdiction shall not be valid. The issuance of a permit based on construction documents and other data shall not prevent the fire code official from requiring the correction of errors in the construction documents and other data. Any addition to or alteration of approved construction documents shall be approved in advance by the fire code official, as evidenced by the issuance of a new or amended permit.
- (i) 105.3.6.1 For structures regulated by the building code as listed in rule 1301:7-7-45 of the Administrative Code. If a building official issues a permit, plan approval or certificate of occupancy for a structure in accordance with the building code as listed in rule 1301:7-7-45 of the Administrative Code for a structure regulated by this code, the responsible person is not exempted from compliance with this code, including provisions for fire safety functions. If a review of fire protection system plans in accordance with (D)(2)(a)(104.2.1) of this rule is not completed or a permit for construction is not issued pursuant to this code, the absence of such review or permit does not prohibit construction from occurring in accordance with the building official's approval.
- (g) 105.3.7 Information on the permit. The fire code official shall issue all permits required by this code on an approved form furnished for that purpose. The permit shall contain a general description of the operation or occupancy and its location and any other information required by the fire code official. Issued permits shall bear the signature of the fire code official or other approved legal authorization.
- (4) 105.4 Construction documents. Construction documents shall be in accordance with this paragraph. The requirement for plan review of fire protection systems in structures regulated by the building code as listed in rule 1301:7-7-45 of the Administrative Code submitted for plan review in accordance with this paragraph is subject to and does not supersede or otherwise conflict with the requirements of paragraph (D)(2)(a)(104.2.1) of this rule.
