certified to provide the services described in this rule will be reimbursed for their costs by the Ohio Department of Aging at a rate negotiated between the provider and the Department's designee. Participation by providers in the programs administered by the Department of Aging is voluntary and those providers for whom the cost of participation is too great are not required to participate. The Department of Aging does not anticipate that there will be any costs of compliance to directly affected persons in the event that this rule is adopted, aside from any possible start-up costs that a provider might incur prior to receiving certification.

16. Does this rule have a fiscal effect on school districts, counties, townships, or municipal corporations? **Yes**

**Rule Summary and Fiscal Analysis (Part B)**

1. Does the Proposed rule have a fiscal effect on any of the following?

(a) School Districts	(b) Counties	(c) Townships	(d) Municipal Corporations
<b>No</b>	<b>Yes</b>	<b>Yes</b>	<b>Yes</b>

2. Please provide an estimate in dollars of the cost of compliance with the proposed rule for school districts, counties, townships, or municipal corporations. If you are unable to provide an estimate in dollars, please provide a written explanation of why it is not possible to provide such an estimate.

Aside from the initial start-up costs associated with becoming a certified provider under this rule, the costs of compliance with this rule should be cost neutral to local governments.

As required under section 173.39 of the Revised Code, the attached rule outlines service specifications for community-based long-term care providers wishing to participate in programs administered by the Department of Aging. Local governments wishing to be certified as providers of the services described in this rule will necessarily incur costs to become certified, but provider participation in programs administered by the Department is voluntary. In addition, once certified, providers are reimbursed for the costs of the services they provide at a rate negotiated in advance between the provider and ODA's designee. Local governments that determine that the costs of their participation as providers will be too high are not required to participate.

The Department is unable to estimate the costs that local governments might incur to become certified providers of the services described in this rule. The costs would necessarily vary depending upon any number of factors, including but not limited to: tax base, regional economic factors, workforce availability, public contract requirements, etc.

3. If the proposed rule is the result of a federal requirement, does the proposed rule exceed the scope and intent of the federal requirement? **No**

4. If the proposed rule exceeds the minimum necessary federal requirement, please provide an estimate of, and justification for, the excess costs that exceed the cost of the federal requirement. In particular, please provide an estimate of the excess costs that exceed the cost of the federal requirement for (a) school districts, (b) counties, (c) townships, and (d) municipal

corporations.

*Not Applicable.*

5. Please provide a comprehensive cost estimate for the proposed rule that includes the procedure and method used for calculating the cost of compliance. This comprehensive cost estimate should identify all of the major cost categories including, but not limited to, (a) personnel costs, (b) new equipment or other capital costs, (c) operating costs, and (d) any indirect central service costs.

Please refer to the answer provided above.

(a) Personnel Costs

(b) New Equipment or Other Capital Costs

(c) Operating Costs

(d) Any Indirect Central Service Costs

(e) Other Costs

6. Please provide a written explanation of the agency's and the local government's ability to pay for the new requirements imposed by the proposed rule.

The department is unable to determine the ability of local governments to pay for the requirements imposed by this rule, but compliance with the rule is only required if local governments wish to participate as providers in programs administered by the Department.

7. Please provide a statement on the proposed rule's impact on economic development.

The availability of public services is but one factor that attracts residents to a community. The community-based long-term care programs funded by the Department are not only one source of those services, but they enable older Ohioans to remain active and productive members of their communities. By enabling providers to be certified to provide the services described in the attached rule, it is anticipated that the attached rule will have a positive impact upon the economic development of the local communities in which the services are readily available.
