

3701:1-66-03

Certification of radiation experts.

(A) An individual may seek certification from the Ohio department of health as a radiation expert in one or more of the following categories of radiation-generating equipment:

- (1) Therapeutic;
- (2) Diagnostic other than mammography; or
- (3) Mammography.

An individual certified as a radiation expert is qualified to develop, provide periodic review of, and conduct audits of the quality assurance program required under division (A) of section 3748.13 of the Revised Code for that category of radiation-generating equipment for which the individual is certified. A certified radiation expert shall be responsible for conducting oversight and maintenance and filing audit reports of quality assurance programs required under division (A) of section 3748.13 of the Revised Code.

(B) An individual seeking certification as a radiation expert shall apply to the department on a form prescribed and provided by the director. The application must contain at least the following:

- (1) Name and address of the applicant;
- (2) Category or categories for which application is being made;
- (3) A non-refundable check or money order payable to "treasurer, state of Ohio" for the appropriate certification fee in the amount of one hundred dollars for each category specified in paragraph (A) of this rule; and as follows:
 - (a) ~~Seventy five dollars for one category as specified in paragraph (A) of this rule; or~~
 - (b) ~~Seventy five dollars plus twenty five dollars for each additional specified category;~~
- (4) Evidence that the applicant has appropriate training and qualifications to perform oversight and maintenance of quality assurance programs required by division (A) of section 3748.13 of the Revised Code for the category for which the applicant is applying as set forth in paragraphs (C) to (E) of this rule;

- (C) An applicant for radiation expert certification for the category of therapeutic radiation-generating equipment shall have at least one of the following:
- (1) Certification by the "American Board of Radiology" in radiological physics or therapeutic radiological physics;
 - (2) Certification by the "American Board of Medical Physics" in medical physics with a specialty in radiation oncology physics; or
 - (3) A master's degree or doctorate from an accredited college or university in physics, biophysics, medical physics, radiological physics, nuclear engineering or health physics, and three years of experience within the five years prior to the date of application under the direct supervision of a certified individual as provided in paragraph (C)(1) or (C)(2) of this rule or a radiation expert certified in therepeutic radiation-generating equipment in developing and performing oversight of quality assurance for therapeutic x-ray equipment including performance evaluations and safety checks.
- (D) An applicant for radiation expert certification for the category of diagnostic radiation-generating equipment shall have at least one of the following:
- (1) Certification by the "American Board of Radiology" in radiological physics or diagnostic radiological physics;
 - (2) Certification by the "American Board of Medical Physics" in medical physics with a specialty in diagnostic imaging physics;
 - (3) A masters degree or doctorate from an accredited college or university in physics, biophysics, medical physics, radiological physics or health physics, or mechanical, electrical, or nuclear engineering, or applied mathematics with a minor in physics; and three years of experience within the five years prior to the date of application under the direct supervision of a certified individual as provided in paragraph (D)(1) or (D)(2) of this rule or a radiation expert certified in diagnostic radiation-generating equipment in developing and performing oversight of quality assurance for diagnostic radiation-generating equipment.
- (E) An applicant for radiation expert certification for the category of mammography radiation-generating equipment shall have at least one of the following:
- (1) Certification by the "American Board of Radiology" in radiological physics or

diagnostic radiological physics;

- (2) Certification by the "American Board of Medical Physics" with a specialty in diagnostic imaging physics;
 - (3) A master's degree or higher in a physical science from an accredited college or university, and at least the following:
 - (a) Twenty semester hours or thirty quarter hours of graduate or undergraduate level physics;
 - (b) Twenty contact hours of documented specialized training in conducting surveys of mammography facilities; and
 - (c) Have the experience of conducting surveys of at least ten mammography x-ray units under the direct supervision of a certified individual as provided in paragraph (E)(1) or (E)(2) of this rule or a radiation expert certified in mammography.
- (F) The department may return an incomplete application for certification or certification renewal. The applicant shall respond to the director's request for additional information within twenty days of receiving the request.
- (G) A certificate issued under this rule shall expire two years after the date of its issuance and may be renewed in accordance with the standard renewal procedures established in Chapter 4745. of the Revised Code. On or before thirty days prior to the expiration of a certificate, the department shall mail a notice and application for renewal to the certificate holder. The certificate holder shall complete the application and return it to the treasurer of state with the certification renewal fee in the form of a check or money order payable to "treasurer, state of Ohio", in the amount of one hundred dollars for each category specified in paragraph (A) of this rule.~~appropriate amount as follows;~~
- ~~(1) Seventy five dollars for one category as specified in paragraph (A) of this rule;~~
~~or~~
 - ~~(2) Seventy five dollars plus twenty five dollars for each additional specified category.~~
- (H) Within sixty days of receiving a complete application for certification or certification renewal, the director shall, pursuant to Chapter 119. of the Revised Code, either issue a certification or certification renewal or, deny the application, or the director may at any time suspend or revoke a certification if the applicant or certificate

holder:

- (1) Does not meet the applicable requirements specified in this rule for attaining and maintaining certification as a radiation expert;
- (2) Previously had a radiation expert certificate revoked or currently has a certificate suspended pursuant to this paragraph;
- (3) Has provided services for a category of radiation-generating equipment that is not identified on his or her radiation expert certificate;
- (4) Misrepresents the types of quality assurance programs for which he or she is certified to provide services or otherwise has provided services for which he or she was not certified to provide;
- (5) Misrepresents information on the application or has misrepresented an audit report filed with the director pursuant to rule 3701:1-66-04 of the Administrative Code;
- (6) Has submitted an audit report to the director that the radiation expert did not personally perform or supervise the individual assisting in the performance of quality assurance tests;
- (7) Does not respond to the request for additional information within twenty days of receiving the request as provided in paragraph (F) of this rule;
- (8) Does not comply with paragraphs (C) to (E) of this rule, as applicable, in which case the director shall deny the application only for that certification for the affected category of radiation-generating equipment;
- (9) Fails to pay any fee assessed in accordance with paragraph (G) of this rule; or
- (10) Fails to comply with Chapter 3748. of the Revised Code or the rules adopted thereunder.

The radiation expert certificate or renewal certification issued by the director shall contain a statement identifying the category or categories of radiation-generating equipment for which the radiation expert is qualified to provide quality assurance services and the date of expiration of that certificate.

- (I) An individual certified as a radiation expert shall immediately notify the director in writing of any change that would render an application or certificate no longer accurate.
- (J) The individual certified as a radiation expert shall provide the director upon request with any other information regarding the requirements set forth in this rule.
- (K) ~~Each certified radiation expert shall obtain at least five hours of continuing education each certification period for each category of radiation-generating equipment for which the radiation expert is certified. A certified radiation expert that provides instruction in a continuing education program related to radiation safety is eligible for up to five hours of the required continuing education per certification period. Continuing education programs must be approved by the director or a recognized professional organization approved by the director. Each certified radiation expert shall obtain continuing education for each certification period in accordance with the requirements of this rule. Individuals initially certified prior to the effective date of this rule, and prior to their first renewal following the effective date of this rule, shall obtain five hours of continuing education for each category specified in paragraph (A) of this rule for which the radiation expert is certified. During each subsequent renewal period, individuals initially certified as radiation experts prior to the effective date of this rule shall meet the applicable requirements of paragraphs (K)(1) to (K)(3) of this rule. For individuals initially certified as a radiation expert after the effective date of this rule, the following continuing education standards shall be met:~~
- (1) certified radiation experts having certification in one category specified in paragraph (A) of this rule shall obtain fifteen hours of continuing education pertaining to the category of certification;
 - (2) certified radiation experts having certification in two categories specified in paragraph (A) of this rule shall obtain twenty hours of continuing education pertaining to one or both categories of certification; and
 - (3) certified radiation experts having certification in three categories specified in paragraph (A) of this rule shall obtain twenty-five hours of continuing education pertaining to one or more categories of certification.
- (L) Continuing education programs are subject to approval by the director.
- (M) A certified radiation expert who provides instruction in a continuing education program related to radiation safety is eligible to claim up to five hours of instruction time for the required continuing education for his or her certification period.

~~(L)~~(N) In accordance with section 3748.12 of the Revised Code, a certification renewal fee that has not been paid within ninety days after the issuance date of the notice required under paragraph (G) of this rule shall be assessed at two times the original invoiced fee. Any fee that has not been paid within one hundred eighty days after the issuance date of the notice required under paragraph (G) of this rule shall be assessed at five times the original invoiced fee.
