

TO BE RESCINDED

4501-45-02

Definitions.

- (A) "Ignition interlock device" means a device approved by the director of the department of public safety that connects a breath analyzer to a motor vehicle's ignition system, that is constantly available to monitor the concentration by weight of alcohol in the breath of any person attempting to start that motor vehicle by using its ignition system, and that deters starting the motor vehicle by use of its ignition system unless the person attempting to so start the vehicle provides an appropriate breath sample for the device and the device determines that the concentration by weight of alcohol in the person's breath is below a preset level.
- (B) "Manufacturer" means any person engaged in the manufacturing or assembling of ignition interlock devices.
- (C) "Person" means every natural person, firm, co-partnership, association, or corporation.
- (D) "Director" means the director of the department of public safety.
- (E) "NHTSA" means the national highway traffic safety administration.
- (F) "Department" means the department of public safety.
