15. Provide a summary of the estimated cost of compliance with the rule to all directly affected persons. When appropriate, please include the source for your information/estimated costs, e.g. industry, CFR, internal/agency:

The costs of compliance for this rule include the requirements for driver training enterprises to maintain acceptable minimum amounts of vehicle insurance and bond/escrow accounts to cover the cost of reimbursing students for training not supplied. The estimated cost of vehicle insurance is approximately \$250 to \$320 annually per vehicle. The full cost of compliance is based upon the number of vehicles the enterprise uses and the amount of coverage in the policy.

Note: Driver training schools may allow their instructors to use personal vehicles for the purposes of training. Therefore, the insurance is maintained and paid by each instructor. Additionally, if the school provides training for another program, they are paying the costs for maintaining the insurance; thereby not incurring any additional costs for insurance for offering this program.

Also, for medically-based hospitals and rehabilitation clinics, the costs are paid by the hospitals and included in a fleet policy. Therefore, the cost on the program is negligible.

The estimated cost of for the bond ranges from 1% to 30% of the actual cost of the

bond. The percentage depends on credit and assets. The amount of coverage required is based upon the number of classroom locations and number of students with whom the school is contractually obligated. Additionally, if the school provides training for another program, they are paying the costs for maintaining the bond or escrow account; thereby not incurring any additional costs for the bond or escrow account for offering this program.

The cost analysis was provided by a committee consisting of current stakeholders of class D, disability, and online providers.
