7. If the rule is an AMENDMENT, then summarize the changes and the content of the proposed rule; If the rule type is RESCISSION, NEW or NO CHANGE, then summarize the content of the rule:

This rule sets forth requirements for the organization and administration of precicensure nursing education programs. Many of the requirements are contained in the existing rule, but additional provisions are added.

In paragraph (B)(7) new language provides that the registered nurse program administrator must establish a faculty to student ratio in clinical settings that is no greater than 10 to 1, and a smaller ratio where necessary to ensure safety. The current rule addresses faculty/student ratios only in general terms.

Paragraph (B)(10) requires that the RN program administrator submit to the board a corrective action plan following submission of one or more incorrect program completion letters. This modifies an existing requirement that a program submit individual student transcripts for a period of 24 months after submitting two erroneous program completion letters within a twenty four month period. The revision gives the board the means to hold program administrators accountable for this critical function, without being unduly onerous and punitive.

Paragraph (C) establishes new requirements for nursing education programs that have multiple locations. These provisions will apply when a program and its other locations share the same philosophy, conceptual framework or organizing theme, program objectives or outcomes, curriculum, and admission/progression/completion policies. The program in its entirety must be overseen by an RN administrator who meets the qualifications established in the chapter. In addition, each location that is more than 60 miles from the principal location would be required to be under the auspices of an RN associate administrator. For programs with other locations that are closer than 60 miles, the board may require the designation of an RN associate administrator based on its assessment of several criteria contained in the rule.

In paragraph (D), new provisions are added for the designation of an interim administrator to oversee a program for up to ninety consecutive business days. The rule will allow an interim administrator to meet the requirements for an associate administrator, rather than the stricter requirements for a program administrator.
