

4766-4-05

Levels Of Service Provided.

Licenses shall be issued to organizations who meet the criteria to provide the following levels of service:

(A) Basic life support;

(B) Intermediate life support;

(C) Advanced life support;

(D) Mobile intensive care- Intrafacility transports necessitating the use of the equipment or conditions noted in the MoICU ground section will be transported by a MoICU. In the event an MoICU is not available, treating physician shall determine the most appropriate means of transport.

(1) Ground

(a) Adult-MoICU's licensed as adult providers are equipped to provide care to patients (14 years and older) in critical condition or with conditions with potential for deterioration during transport:

(i) Equipment requirements for an adult MoICU include pediatric sizes necessary to care for small adult patients;

(ii) Equipment specific to an adult critical patient include but are not limited to:

(a) Invasive monitors-Arterial lines, CVP monitors, ICP needles;

(b) Cardiac assist devices such as transvenous pacemakers, Intra-aortic balloon pumps, ventricular assist devices;

(c) Specialty Drug Delivery-epidural catheters, intra-osseous lines previously inserted;

(d) Respiratory equipment-ventilators with PEEP or Pressure support, chest tubes.

(b) Pediatric- MoICU's licensed as pediatric providers are equipped to provide care to pediatric patients (29days-18 years) in critical condition or with conditions with potential for deterioration during transport. Exception granted for ages 18 and above when the condition of the patient is the result of a congenital anomaly or condition more appropriately treated in a pediatric setting in which the patient has been receiving care:

(i) Equipment requirements for a pediatric MoICU include adult and

neonatal sizes necessary to care for small and large pediatric patients;

(ii) Equipment specific to a pediatric critical patient include but are not limited to:

(a) Invasive monitors-Arterial lines, CVP monitors, ICP needles;

(b) Cardiac assist devices such as transvenous pacemakers, ventricular assist devices, extracorporeal support (ECMO);

(c) Specialty drug delivery-epidural catheters, intra-osseous lines previously inserted;

(d) Respiratory equipment-ventilators, artificial airways, chest tubes.

(c) Neonatal- MoICU's licensed as neonatal providers are equipped to provide care to neonatal patients (up to 28 days of life) in critical condition or with conditions with potential for deterioration during transport:

(i) Equipment requirements for a neonatal MoICU include pediatric sizes necessary to care for large neonates;

(ii) Equipment specific to a neonatal critical patient include but are not limited to:

(a) Invasive monitors-umbilical arterial and venous lines, CVP monitors, ICP needles;

(b) Cardiac assist devices such as transvenous pacemakers, ventricular assist devices, extracorporeal support (ECMO);

(c) Specialty drug delivery-epidural catheters, intra-osseous lines previously inserted;

(d) Respiratory equipment-ventilators, nitric oxide, artificial airways, chest tubes.

(2) Fixed wing;

(3) Rotor wing.

(E) An organization shall not profess to engage in or advertise any level of service other than those defined in division (B) of section 4766.04 of the Revised Code.

(F) The certificate of licensure issued by the board shall indicate the highest level of service that the organization is authorized to provide.
