

4901:1-6-15

Number optimization.

Pursuant to the commission's number optimization policies in case no. 97-884-TP-COI, all number holding telephone companies, including CMRS, must adhere to the following requirements:

- (A) Upon request, provide copies of all NXX code requests to the North American numbering plan administrator (NANPA) or thousands block requests to the pooling administrator simultaneously to the chief of the telecommunications division of the utilities department of the commission.
- (B) Initial and growth NXX code or thousands block requests must comply with applicable federal regulation.
- (C) The telephone company must obtain NXX codes from NANPA or thousands blocks from the pooling administrator only for those areas where it is certified and plans to activate service within six months. If a telephone company is unable to meet the six-month deadline for placing a code or thousands block into service by returning a part four form to NANPA or to the pooling administrator, then further action regarding this code or thousands block is the responsibility of the commission and the telephone company.
- (D) The telephone company will adopt all current and future number resource optimization measures set forth by the commission in case no. 97-884-TP-COI or future related cases.
