

5101:2-9-04

General maintenance of a residential facility.

- (A) All structures, grounds, furnishings or equipment used by or located on the grounds of a residential facility shall be continually maintained in good repair and in clean condition.
- (B) All rooms, corridors, and stairways within a residential facility shall be equipped with operable electric illumination.
- (C) Each residential facility shall have working exterior electrical illumination for operable entrances and stairways to occupied buildings.
- (D) A residential facility shall have a continuous supply of clean drinking water. If the residential facility's water supply is not obtained from a municipal water supply, a water district water supply or a vendor of bottled water, the facility's water supply shall be tested and approved by a municipal or county health department or by the Ohio department of health prior to initial certification or recertification. A residential facility shall not be certified or recertified without an approved water source.
