Rancho Los Amigos Levels of Cognitive Functioning

Level I	No Response: Total Assistance
-	sence of observable change in behavior when presented visual, auditory, tactile, e, vestibular or painful stimuli.
Level II	Gene ralized Response: Total Assistance
Demonstrates	s generalized reflex response to painful stimuli.
Responds to	repeated auditory stimuli with increased or decreased activity.
Responds to purposeful vo	external stimuli with physiological changes generalized, gross body movement and/or not ocalization.
Responses no	oted above may be same regardless of type and location of stimulation.
Responses m	ay be significantly delayed.
Level III	Localized Response: Total Assistance
Demonstrate	s withdrawal or vocalization to painful stimuli.
Turns toward	l or away from auditory stimuli.
Blinks when	strong light crosses visual field.
Follows mov	ing object passed within visual field.
Responds to	discomfort by pulling tubes or restraints.
Responds inc	consistently to simple commands.
Responses di	rectly related to type of stimulus.
May respond	to some persons (especially family and friends) but not to others.
Level IV	Confused/Agitated: Maximal Assistance
Alert and in l	neightened state of activity.
Purposeful a	ttempts to remove restraints or tubes or crawl out of bed.
May perform	motor activities such as sitting, reaching and walking but without any apparent purpose

or upon another's request.

Very brief and usually non-purposeful moments of sustained alternatives and divided attention.

Absent short-term memory.

May cry out or scream out of proportion to stimulus even after its removal.

May exhibit aggressive or flight behavior.

Mood may swing from euphoric to hostile with no apparent relationship to environmental events.

Unable to cooperate with treatment efforts.

Verbalizations are frequently incoherent and/or inappropriate to activity or environment.

Level V Confused, Inappropriate Non-Agitated: Maximal Assistance

Alert, not agitated but may wander randomly or with a vague intention of going home.

May become agitated in response to external stimulation, and/or lack of environmental structure.

Not oriented to person, place or time.

Frequent brief periods, non-purposeful sustained attention.

Severely impaired recent memory, with confusion of past and present in reaction to ongoing activity.

Absent goal directed, problem solving, self-monitoring behavior.

Often demonstrates inappropriate use of objects without external direction.

May be able to perform previously learned tasks when structured and cues provided.

Unable to learn new information.

Able to respond appropriately to simple commands fairly consistently with external structures and cues.

Responses to simple commands without external structure are random and non-purposeful in relation to command.

Able to converse on a social, automatic level for brief periods of time when provided external structure and cues.

Verbalizations about present events become inappropriate and confabulatory when external structure and cues are not provided.

	Confused, Appropriate: Moderate Assistance
Inconsistently	v oriented to person, time and place.
Able to attend redirection.	to highly familiar tasks in non-distracting environment for 30 minutes with moderate
Remote mem	ory has more depth and detail than recent memory.
Vague recogi	nition of some staff.
Able to use a	ssistive memory aide with maximum assistance.
Emerging aw	areness of appropriate response to self, family and basic needs.
Moderate ass	ist to problem solve barriers to task completion.
Supervised for	or old learning (e.g. self care).
Shows carry	over for relearned familiar tasks (e.g. self care).
Maximum as	sistance for new learning with little or nor carry over.
Unaware of i	mpairments, disabilities and safety risks.
Consistently	follows simple directions.
Verbal expre	ssions are appropriate in highly familiar and structured situations.
Level VII	Automatic, Appropriate: Minimal Assistance for Daily Living Skills
	Automatic, Appropriate: Minimal Assistance for Daily Living Skills priented to person and place, within highly familiar environments.
Consistently	
Consistently Moderate ass Able to attend	priented to person and place, within highly familiar environments.

It to highly familiar tasks in a non-distraction environment for at least 30 minutes with at to complete tasks. ervision for new learning. as carry over of new learning. carries out steps to complete familiar personal and household routine but has shallow

limits they place on his/her ability to safely, accurately and completely carry out his/her household, community, work and leisure ADLs.

Minimal supervision for safety in routine home and community activities.

Unrealistic planning for the future.

Unable to think about consequences of a decision or action.

Overestimates abilities.

Unaware of others' needs and feelings.

Oppositional/uncooperative.

Unable to recognize inappropriate social interaction behavior.

Level VIII | Purposeful, Appropriate: Stand-By Assistance

Consistently oriented to person, place and time.

Independently attends to and completes familiar tasks for 1 hour in distracting environments.

Able to recall and integrate past and recent events.

Uses assistive memory devices to recall daily schedule, "to do" lists and record critical information for later use with stand-by assistance.

Initiates and carries out steps to complete familiar personal, household, community, work and leisure routines with stand-by assistance and can modify the plan when needed with minimal assistance.

Requires no assistance once new tasks/activities are learned.

Aware of and acknowledges impairments and disabilities when they interfere with task completion but requires stand-by assistance to take appropriate corrective action.

Thinks about consequences of a decision or action with minimal assistance.

Overestimates or underestimates abilities.

Acknowledges others' needs and feelings and responds appropriately with minimal assistance.

Depressed.

Irritable.

Low frustration tolerance/easily angered.

Argumentative.

Self-centered.

Uncharacteristically dependent/independent.

Able to recognize and acknowledge inappropriate social interaction behavior while it is occurring and takes corrective action with minimal assistance.

Level IX Purposeful, Appropriate: Stand-By Assistance on Request

Independently shifts back and forth between tasks and completes them accurately for at least two consecutive hours.

Uses assistive memory devices to recall daily schedule, "to do" lists and record critical information for later use with assistance when requested.

Initiates and carries out steps to complete familiar personal, household, work and leisure tasks independently and unfamiliar personal, household, work and leisure tasks with assistance when requested.

Aware of and acknowledges impairments and disabilities when they interfere with task completion and takes appropriate corrective action but requires stand-by assist to anticipate a problem before it occurs and take action to avoid it.

Able to think about consequences of decisions or actions with assistance when requested.

Accurately estimates abilities but requires stand-by assistance to adjust to task demands.

Acknowledges others' needs and feelings and responds appropriately with stand-by assistance.

Depression may continue.

May be easily irritable.

May have low frustration tolerance.

Able to self monitor appropriateness of social interaction with stand-by assistance.

Level X Purposeful, Appropriate: Modified Independent

Able to handle multiple tasks simultaneously in all environments but may require periodic breaks.

Able to independently procure, create and maintain own assistive memory devices.

Independently initiates and carries out steps to complete familiar and unfamiliar personal, household, community, work and leisure tasks but may require more than usual amount of time and/or compensatory strategies to complete them.

Anticipates impact of impairments and disabilities on ability to complete daily living tasks and takes action to avoid problems before they occur but may require more than usual amount of time and/or compensatory strategies.

Able to independently think about consequences of decisions or actions but may require more than usual amount of time and/or compensatory strategies to select the appropriate decision or action.

Accurately estimates abilities and independently adjusts to task demands.

Able to recognize the needs and feelings of others and automatically respond in appropriate manner.

Periodic periods of depression may occur.

Irritability and low frustration tolerance when sick, fatigued and/or under emotional stress.

Social interaction behavior is consistently appropriate.
