FISCAL ANALYSIS

13. Estimate the total amount by which *this proposed rule* would **increase/decrease** either **revenues /expenditures** for the agency during the current biennium (in dollars): Explain the net impact of the proposed changes to the budget of your agency/department.

This will increase expenditures.

62,000

The department across its facilities has averaged funding 5.15 loans per year over the last four years. If the number of loans in the program remains constant, the increased annual loan repayment limits could allow for an annual increase of \$31,000, or a \$62,000 increase over the biennium. This estimate is an upper limit that would be reached only if the annual limits for all loans in the program were reached. The funding for the increased payments will come from budget efficiencies in regional psychiatric hospitals and loan repayment offers will be contingent upon available funding.

14. Identify the appropriation (by line item etc.) that authorizes each expenditure necessitated by the proposed rule:

Not applicable.

15. Provide a summary of the estimated cost of compliance with the rule to all directly affected persons. When appropriate, please include the source for your information/estimated costs, e.g. industry, CFR, internal/agency:

There is no cost of compliance for this rule.
