DMEPOS: ambulation aids.**(A) Definitions.**

- (1) "Ambulation aid" is a collective term for a cane, crutch, or walker.
- (2) "Ambulatory limitation" is an impediment to walking that has either of two effects:
 - (a) It prevents an individual from completing activities of daily living within a reasonable time (or at all); or
 - (b) It places an individual at a demonstrably higher risk of injury, exacerbation of illness, or death when activities of daily living are performed.

(B) Coverage.

- (1) Payment may be made for a covered ambulation aid if all of the following criteria are met:
 - (a) The individual has an ambulatory limitation that is documented in the individual's medical record;
 - (b) The ambulation aid has been prescribed by a qualified practitioner;
 - (c) The individual is able to use the ambulation aid safely; and
 - (d) The ambulation aid reduces the ambulatory limitation enough to permit the individual to complete activities of daily living in a reasonable amount of time and with a reasonable degree of safety.
- (2) Additional coverage criteria are specific to particular ambulation aids:
 - (a) For a heavy-duty walker, the individual weighs at least three hundred pounds.
 - (b) For a heavy-duty walker with multiple braking system and variable wheel resistance (a four-wheeled walker having at least two wheels with hand-operated brakes that can be independently adjusted and lock the wheels when either or both hand levers are released), the individual both weighs at least three hundred pounds and is unable to use a standard heavy-duty walker because the use of one hand is restricted.

- (c) For an enclosed-frame walker, the prescriber describes and attests in writing to the medical necessity, and the provider keeps a copy of this document in the individual's file.
- (d) For a trunk-support walker, the prescriber describes and attests in writing to the medical necessity, and the provider keeps a copy of this document in the individual's file.
- (e) For walker leg extensions, the individual stands at least six feet tall.
- (f) For a white cane (long cane), the shaft of the cane is rigid (i.e., lacks joints), and the individual cannot obtain a similar item at no cost from another source, such as the "Free White Cane Program" of the national federation of the blind (<http://nfb.org>); in accordance with rule 5160-1-02 of the Administrative Code, medicaid payment is disallowed for an item that can be obtained free of charge.
