

901:1-1-04

CWD Positive, Exposed, or Trace herds.

- (A) If an epidemiologic investigation reveals that a monitored captive deer, captive deer with status, or captive deer with certified chronic wasting disease status herd is chronic wasting disease positive, exposed, or a trace herd, the herd shall be immediately quarantined.
- (B) Positive, exposed or trace herds require the completion of a herd plan before the chief, animal health division, may release the quarantine.
