\$0.00

Not applicable.

14. Identify the appropriation (by line item etc.) that authorizes each expenditure necessitated by the proposed rule:

Not applicable.

15. Provide a summary of the estimated cost of compliance with the rule to all directly affected persons. When appropriate, please include the source for your information/estimated costs, e.g. industry, CFR, internal/agency:

Rule 901:1-17-03 requires cattle and bison producers to test for the presence of trichomoniasis in bulls prior to entering the state. This requires employer time for compliance as well as the cost for the test itself. Any bulls that test positive from trichomoniasis shall not be imported into the state except for the purposes of slaughter.

The cost of compliance with rule 901:1-17-03 is minimal compared to the potential impact of the spread of trichomoniasis to the industry. The average cost of the test is \$35. Most of this cost will be absorbed by out-of-state exporters. Additionally, there is the potential loss for any producer who purchases a positive bull out of state prior to testing. However, this loss can be made up financially through slaughter.

16. Does this rule have a fiscal effect on school districts, counties, townships, or municipal corporations? **No**

17. Does this rule deal with environmental protection or contain a component

dealing with environmental protection as defined in R. C. 121.39? **No**
