TO BE RESCINDED

901:10-2-18 Closure plan requirements.

A closure plan shall describe how the use of the manure storage or treatment facility will be closed or discontinued. The closure plan must comply with the following best management practices:

- (A) The owner or operator of the manure storage or treatment facility must:
 - (1) At least ninety days before closing the manure storage or treatment facility, the owner or operator shall notify the department and submit plans for closure.
 - (2) Have all the manure removed from the manure storage or treatment facility.
 - (3) Have all associated appurtenances and conveyance structures removed from uncovered liquid manure storage or treatment facilities.
 - (4) Have the manure land applied in accordance with rule 901:10-2-14 of the Administrative Code.
- (B) If the concentrated animal feeding facility will not be completely closed, the owner or operator shall apply for a permit modification for that part of the manure storage or treatment facility to be closed and:
 - (1) Recalculate the storage volume for the facility and, if applicable, submit an application for a permit to install or a permit modification to the director.
 - (2) Inform the director if the manure storage or treatment facility is to be converted to another use.
