5. What statute(s) does the rule implement or amplify? 917.02
6. What are the reasons for proposing the rule?

The rule is up for five year rule review.
7. Summarize the rule's content, and if this is an amended rule, also summarize the rule's changes.

OAC 901:11-3-07 outlines the process for taking corrective actions when a deviation from a critical limit occurs. The rule states that all corrective action plans shall ensure that no product which may be injurious to consumer health or otherwise adulterated enter the stream of commerce. The rule also requires that the cause of this deviation be corrected. There are no changes proposed to this rule.

8. Does the rule incorporate material by reference? Yes
9. If the rule incorporates material by reference and the agency claims the material is exempt pursuant to R.C. 121.71 to 121.76, please explain the basis for the exemption and how an individual can find the referenced material.
Pursuant to section 121.76 of the Revised Code, the code sections incorporated into this rule are exempt from compliance with sections 121.71 to 121.74 of the Revised Code.
10. If revising or re-filing the rule, please indicate the changes made in the revised or re-filed version of the rule.

12. What are the estimated costs of compliance for all persons and/or organizations directly affected by the rule?

Milk haulers, dealers, producers, and processors all must meet the requirements of the rules and pay a \$15 annual licensing fee to the Department's Dairy Division. As outlined in 917.031, the inspection fees for the Dairy Division shall not exceed 63% of the estimated cost of administering and enforcing Chapter 917 of the Revised Code. Currently, this fee breaks down to \$146,000 monthly paid by industry. This figure is then broken down to a per-pound fee which is sent to manufacturers based on their usage of dairy products. The adverse impact of these regulations is difficult to quantify as it is hard to separate production practices from regulation. The regulations dictate some equipment specifications; however equipment manufacturers specifically tailor their machinery to meet the regulations. Additionally, there are record keeping requirements which require time for employer compliance however; for the most part the machinery used in this industry automatically records this information.
