

901:13-1-03**Seepage from animal manure management facilities.**

- (A) Each owner, operator, or person responsible for an animal feeding operation shall prevent pollution by designing, constructing, operating and maintaining their operations to prevent seepage from manure management facilities from entering waters of the state.
- (B) Animal feeding operations found by the director or the director's designee to have failed to implement best management practices and have caused pollution to waters of the state shall develop, obtain approval, and implement modifications to their manure management facilities according to the field office technical guide or other methods approved by the director or the director's designee.
- (C) Consideration should be given to soils, geology, and ground water where manure management facilities are located.
- (D) Geologic investigations shall be made prior to design and construction of all earthen holding ponds and lagoons to identify the potential for pollution of waters of the state. Information collected from these investigations should be used in the design and construction of manure management facilities.
