

901:13-1-09

Wind erosion.**Each**

(A) Each owner, operator, or person responsible for agricultural operations shall prevent pollution caused by wind erosion. ~~Agricultural operations found by the director or the director's designee to have failed to implement best management practices (BMPs) to prevent wind erosion and have caused pollution to waters of the state shall apply and maintain BMPs such that the predicted soil loss from wind erosion, under a given set of cropping and management conditions is equal to or less than "T" as predicted by the "Field Office Technical Guide."~~

(B) Agricultural operations found by the director or the director's designee to have failed to implement best management practices to prevent wind erosion and have caused pollution to waters of the state shall apply and maintain best management practices as outlined in paragraph (C) of this rule.

(C) Agricultural operations subject to paragraph (B) of this rule shall:

(1) Utilize the "Field Office Technical Guide" to determine the combined soil loss values of:

(a) Predicted soil loss for wind erosion under current and planned cropping and management conditions; and

(b) Predicted soil loss from sheet and rill erosion, if applicable.

(2) Apply best management practices to ensure that the combined soil loss value determined in paragraph (C)(1) of this rule is equal to or less than the "Field Office Technical Guides" permissible soil loss for the agricultural operations specific soil series.
