OAC 901:5-58- ODA is proposing this as a new rule. The rules contained in this chapter establish a quarantine against the highly destructive insect *Cydalima perspectalis*, more commonly known as the Box Tree Moth (BTM or "plant pest"). The Ohio Department of Agriculture (Department) is establishing this quarantine to prevent the plant pest's artificial spread in the state of Ohio to protect Ohio's horticulture industry

from this destructive pest. BTM is a federally regulated pest, as such, the establishment of this regulation is necessary to limit the effect of the federal regulation to just those areas of Ohio that are known to be infested with BTM rather than subject the entire state to the federal requirements.

Individuals are prohibited from moving any regulated article from a regulated area into a non-regulated area unless they meet the conditions of movement in OAC 901:5-58-05. Individuals may be prohibited to ship to and from certain regulated areas which may cause lost potential profits. By establishing a quarantine and placing restrictions on movement, the Department is preventing the artificial spread of the plant pest and therefore, helping to maintain a vital industry in Ohio. The quarantine

regulation also prevents the impact of the federal regulation to only those areas within Ohio that have a BTM infestation as determined by official insect surveys.
