The credible data program classifies surface water monitoring performed by watershed groups, state agencies, schools, local volunteers and other organizations. Ohio EPA uses the data submitted under the program in ways prescribed by State law.

In 2006, Ohio EPA adopted rules that establish criteria for three levels of credible data related to surface water monitoring and assessment. The rules also: define training and experience requirements for qualified data collectors (QDCs); describe sampling protocols and field methods to ensure that the data collection and interpretation are reproducible, scientifically defensible and free from pre-conceived bias; and require Ohio EPA to establish and maintain a computerized database of all credible water quality data submitted to the Agency.

Section 119.032 of the Revised Code requires Ohio EPA to review its rules every five years to determine whether they should be changed. The Agency has reviewed the credible data rules and has identified needed changes.

The public comment period will run until **5:00 p.m. on May 24, 2011**. A public hearing on these proposed rule amendments will be held to consider public comments in accordance with Section 119.03 of the Ohio Revised Code. This hearing will be held in **Conference Room B at the Ohio EPA Central Office, 50 West Town Street, Suite 700, Columbus, Ohio at 2:00 p.m. on May 24, 2011**. All visitors to Ohio EPA must register at the Security desk in the lobby upon arrival. Please bring photo identification (such as a valid driver's license). For security reasons, visitors are required to wear their badge at all times while in the building. Please
