

MEMORANDUM OF RESPONSE

The Board of Building Standards (Board) has reviewed the response from the CSI Office regarding rule 4101:3-7-01. The CSI Office provided no recommendations regarding this proposed rule and concluded that the Board should proceed with formal filing with JCARR. The Board is filing the proposed rule accordingly.

The following modification to this rule has been made since the rule was posted for review and filed with the CSI Office:

- Section 701.8 – Eliminated this section as redundant. All existing building piping systems are to comply with OBC Chapter 34 regardless of this section, not just sanitary piping.

The Board does not estimate an increased cost to the business community to comply with this rule due to the modifications listed above. The modification is editorial in nature.
