However, rule 4101:1-1-01 does require, prior to commencing construction of or within a building, that a building owner obtain a certificate of plan approval from the building department having jurisdiction. This certificate of plan approval is considered a license to build in accordance with the approved plans. The owner is required to demonstrate compliance with the rules of the Board through the submission of construction documents to the building department having jurisdiction. In accordance with rule 4101:1-1-01, if the proposed plans do not comply with the rules of the board, the building department having jurisdiction is required to issue an adjudication order which gives the building owner the right to appeal.

These certificates are evidence that compliance with the rules of the Board has been achieved.
