Except as provided in paragraph (D)(3) of this rule, any claim or application for compensation and/or benefits for an injury to any part or parts of the body not specified in the original claim will be barred unless written notice of the additional part or parts of the body claimed to have been injured is filed by the claimant with the bureau of workers' compensation or the industrial commission within two years of the date when injured.

 - (f) The above provisions govern berylliosis and radiation claims except that payment of compensation is not restricted to temporary total, permanent total disability and/or death, and that exposure in this state is not required for radiation claims. In radiation claims, where disability began prior to November 2, 1959, the general occupational disease provisions apply.
 - (g) The above claims, except claims for berylliosis, must be filed within one year after total disability begins or within such longer period as does not exceed six months after diagnosis by a licensed physician. Claims for berylliosis must be filed within the time as provided in paragraph (D)(4) of this rule. If the disability due to the disease began on or after January 1, 1979, or was diagnosed by a licensed physician on or after January 1, 1979, such claims shall be forever barred unless, within two years after the date of disability due to the disease, or within such longer period as does not exceed six months after diagnosis of the occupational disease by a licensed physician, application is made to the industrial commission, the bureau, or to the employer in the event such employer has elected to pay compensation or benefits directly, or the applicable statute of limitations is extended due to the employer's failure to file a report as required by section 4123.28 of the Revised Code.
