Part B - Local Governments Questions

1. Does the rule increase costs for:

A. Public School Districts	No
B. County Government	Yes
C. Township Government	No
D. City and Village Governments	No

2. Please estimate the total cost, in dollars, of compliance with the rule for the affected local government(s). If you cannot give a dollar cost, explain how the local government is financially impacted.

The Ohio Department of Medicaid (ODM) supplies funding to Ohio's 88 counties through the Ohio Department of Job and Family Services, Bureau of County Finance and Technical Assistance. This funding is intended to properly supply counties with enough funding to conduct eligibility determinations and casework for the Medicaid Program. State funds are supplied for matching through a mechanism called the Income Maintenance (IM) Allocation. As expenditures are charged the federal portion of these expenditures is also supplied to the counties; however, the Department cannot estimate a cost of compliance that a county may face as each county operates daily at different work levels and funds the work done locally differently. Historically counties have not reported spending in excess of the allocation.

3. Is this rule the result of a federal government requirement? No

A. If yes, does this rule do more than the federal government requires? *Not Applicable*

B. If yes, what are the costs, in dollars, to the local government for the regulation that exceeds the federal government requirement?

Not Applicable

4. Please provide an estimated cost of compliance for the proposed rule if it has an impact on the following:

A. Personnel Costs

There will be an increase in training costs as a result of the amended Medicaid eligibility rules; however, each county operates daily at different work levels and funds the work done locally differently. Historically counties have not reported spending in excess of the allocation and it is not expected that this change to policy would greatly change that dynamic.

B. New Equipment or Other Capital Costs

The Department of Medicaid does not expect any changes in capital costs.

C. Operating Costs

Counties may incur increased operating costs; however, each county operates daily at different work levels and funds the work done locally differently. Historically counties have not reported spending in excess of the allocation and it is not expected that this change to policy would greatly change that dynamic.

D. Any Indirect Central Service Costs

Counties may incur increased indirect central service costs; however, each county operates daily at different work levels and funds the work done locally differently. Historically counties have not reported spending in excess of the allocation and it is not expected that this change to policy would greatly change that dynamic.

E. Other Costs

The Department of Medicaid does not know whether counties will incur increased additional costs. There will be an increase in training costs as a result of the amended Medicaid eligibility rules; however, each county operates daily at different work levels and funds the work done locally differently. Historically counties have not reported spending in excess of the allocation and it is not expected that this change to policy would greatly change that dynamic.

5. Please explain how the local government(s) will be able to pay for the increased costs associated with the rule.

The Ohio Department of Medicaid (ODM) supplies funding to Ohio's counties through the Ohio Department of Job and Family Services which funds counties to conduct eligibility determinations and complete casework for the Medicaid program.

6. What will be the impact on economic development, if any, as the result of this rule?

The Ohio Department of Medicaid does not expect the proposed rule to have an impact on economic development.
