

## TO BE RESCINDED

5501:2-1-06

**Inactive permit application procedure.**

The permit application procedures described in rule 5501:2-1-03 of the Administrative Code are fully applicable to inactive permit applications except as noted below:

- (A) Application content. The application may omit either the destination or route or both. All other requested data must be supplied.
- (B) Conversion to active permit. When a permit application is approved as an inactive permit, the inactive permit holder will be permitted to purchase an unlimited number of validation stickers per inactive permit. When the applicant is prepared to move the prequalified load, a telephone request is then made to the central permit office and must include information on destination and route that was not previously supplied. If the movement is approved, a validation number will be issued by telephone which the inactive permit holder then transcribes onto the sticker along with the approved routing. The inactive permit then becomes a validated active permit when the sticker is placed on the face of the inactive permit.
