

CSI - Ohio

The Common Sense Initiative

Business Impact Analysis

Agency Name: Ohio Department of Medicaid (ODM)

Regulation/Package Title: Surgical Services

Rule Number(s):

To Be Rescinded: 5160-4-22

New: 5160-4-22

Date: February 12, 2015

Rule Type:

New
 Amended

5-Year Review
 Rescinded

The Common Sense Initiative was established by Executive Order 2011-01K and placed within the Office of the Lieutenant Governor. Under the CSI Initiative, agencies should balance the critical objectives of all regulations with the costs of compliance by the regulated parties. Agencies should promote transparency, consistency, predictability, and flexibility in regulatory activities. Agencies should prioritize compliance over punishment, and to that end, should utilize plain language in the development of regulations.

Regulatory Intent

1. Please briefly describe the draft regulation in plain language.

Please include the key provisions of the regulation as well as any proposed amendments.

Current rule 5160-4-22, "Surgical services," sets forth provisions for coverage of and payment for surgical services performed in non-hospital settings. This rule is being proposed for rescission, along with its appendix.

New rule 5160-4-22, "Surgical services," sets forth provisions for coverage of and payment for surgical services performed in non-hospital settings. This rule is being proposed for adoption to replace current rule 5160-4-22.

Changes: Four main differences may be noted in the new rule:

- The text is condensed and streamlined.
- The appendix to the current rule, which is rescinded, addresses four groups of surgical procedures whose characteristics may affect how they are reported on a claim and how payment for them is made: (1) multiple procedures, for which payment is reduced when more than one is performed; (2) bilateral procedures, for which payment is adjusted when they are performed on both body parts of a corresponding pair; (3) assistant-at-surgery procedures, for which payment is reduced when they are performed by an assistant at surgery; and (4) procedures performed on fingers, toes, eyelids, or coronary arteries. In place of the appendix, a provision is added in the body of the new rule stating that the department follows Medicare policies concerning these procedures.
- A restriction is removed that disallowed payment for an assistant-at-surgery procedure performed by someone other than a physician.
- A statement is added that payment for the surgical treatment of obesity, a service that was previously non-covered, now requires prior authorization.

2. Please list the Ohio statute authorizing the Agency to adopt this regulation.

Section 5164.02 of the Ohio Revised Code.

3. Does the regulation implement a federal requirement? Is the proposed regulation being adopted or amended to enable the state to obtain or maintain approval to administer and enforce a federal law or to participate in a federal program?

If yes, please briefly explain the source and substance of the federal requirement.

Under provisions of the Social Security Act, surgical services are mandatory Medicaid services. The proposed changes in the rule are being made to improve administration of the Medicaid benefit.

4. If the regulation includes provisions not specifically required by the federal government, please explain the rationale for exceeding the federal requirement.

This rule does not exceed federal requirements.

5. What is the public purpose for this regulation (i.e., why does the Agency feel that there needs to be any regulation in this area at all)?

Medicaid rules perform several core business functions: They establish and update coverage and payment policies for medical goods and services. They set limits on the types of entities that can receive Medicaid payment for these goods and services. They publish payment formulas or fee schedules for the use of providers and the general public. No alternative is readily apparent.

6. How will the Agency measure the success of this regulation in terms of outputs and/or outcomes?

The success of these rules will be measured by the extent to which claims for assistant-at-surgery services performed by someone other than a physician and prior authorization requests for bariatric surgery are correctly processed in the Medicaid Information Technology System (MITS).

Development of the Regulation

7. Please list the stakeholders included by the Agency in the development or initial review of the draft regulation.

If applicable, please include the date and medium by which the stakeholders were initially contacted.

Both the current rule and the new rule have gone through the public-comment process known as Clearance.

8. What input was provided by the stakeholders, and how did that input affect the draft regulation being proposed by the Agency?

As a result of a question submitted during Clearance, a restriction has been removed that disallowed payment for an assistant-at-surgery procedure performed by someone other than a physician.

9. What scientific data was used to develop the rule or the measurable outcomes of the rule? How does this data support the regulation being proposed?

Because the change in policy is strictly administrative, no utilization or expenditure data were needed.

10. What alternative regulations (or specific provisions within the regulation) did the Agency consider, and why did it determine that these alternatives were not appropriate? If none, why didn't the Agency consider regulatory alternatives?

The current rule is being rescinded.

For the new rule, the simplest course of action concerning multiple procedures, bilateral procedures, assistant-at-surgery procedures, and procedures performed on fingers, toes, eyelids, or coronary arteries was to adopt Medicare policies. Whether to cover a particular procedure or type of procedure (e.g., assistant-at-surgery service, surgical treatment of obesity) admits of only a few options: yes, no, or with conditions.

11. Did the Agency specifically consider a performance-based regulation? Please explain. *Performance-based regulations define the required outcome, but don't dictate the process the regulated stakeholders must use to achieve compliance.*

The concept of performance-based rule-making does not apply to these services.

12. What measures did the Agency take to ensure that this regulation does not duplicate an existing Ohio regulation?

Rules involving Medicaid providers are housed exclusively within agency 5160 of the Ohio Administrative Code. Within this division, rules are generally separated out by topic. It is clear which rules apply to which type of provider and item or service; in this instance, there was no duplication.

13. Please describe the Agency's plan for implementation of the regulation, including any measures to ensure that the regulation is applied consistently and predictably for the regulated community.

The policy changes will be incorporated into (1) internal Medicaid processes and (2) the Medicaid Information Technology System (MITS), which is the department's electronic claim-payment system. Incorporation into ODM processes and systems will ensure that the rules are applied consistently and predictably.

Adverse Impact to Business

- 14. Provide a summary of the estimated cost of compliance with the rule. Specifically, please do the following:**
- a. **Identify the scope of the impacted business community;**
 - b. **Identify the nature of the adverse impact (e.g., license fees, fines, employer time for compliance); and**
 - c. **Quantify the expected adverse impact from the regulation.**
The adverse impact can be quantified in terms of dollars, hours to comply, or other factors; and may be estimated for the entire regulated population or for a “representative business.” Please include the source for your information/estimated impact.
 - a. This rule affects providers of surgical services.
 - b. The current rule specifies that when applying a cast in the absence of surgery, a provider "must maintain, at a minimum, documentation that supports that the service was an initial cast application for a non-surgical service and the quantity and description of the casting supplies." (This requirement is omitted from the new rule.)
In the new rule, a statement is added that payment for the surgical treatment of obesity, a service that was previously non-covered, now requires prior authorization.
 - c. A notation that a cast was applied without a related surgical procedure would naturally be included in an individual's medical record; no expenditure of time or effort can therefore be attributed to the rule. It is not clear whether the amount of material used is routinely recorded in the medical record; if not, this rule provision could require from ten to thirty seconds per procedure, the total time depending on the technological sophistication of the provider's record-keeping system (networked data entry, handwritten log sheets).
The adverse impact of the new rule lies in the time needed to fill out paperwork. ODM estimates that each prior authorization request will take about 15 minutes to complete.

15. Why did the Agency determine that the regulatory intent justifies the adverse impact to the regulated business community?

The regulatory requirement in the current rule to maintain documentation of cast application is omitted from the new rule.

Prior authorization is often set as a requirement for processing certain claims. It is an effective tool for preventing fraud, waste, and abuse and for promoting quality and cost-effectiveness; it helps to ensure that the Ohio Medicaid program pays for services that are most appropriate to the needs of the person who will receive them.

Regulatory Flexibility

16. Does the regulation provide any exemptions or alternative means of compliance for small businesses? Please explain.

Provider enrollment requirements are not predicated on the size of an entity and cannot be waived on that basis.

17. How will the agency apply Ohio Revised Code section 119.14 (waiver of fines and penalties for paperwork violations and first-time offenders) into implementation of the regulation?

The rule imposes no fines or penalties.

18. What resources are available to assist small businesses with compliance of the regulation?

Providers that submit claims through an electronic clearinghouse (a “trading partner”) can generally rely on the clearinghouse to know current Medicaid claim-submission procedures.

Information sheets and instruction manuals on various claim-related topics are readily available on the Medicaid website.

The Bureau of Provider Services renders technical assistance to providers through its hotline, (800) 686-1516.

ODM staff members are available to provide policy interpretation.

*** DRAFT - NOT YET FILED ***

TO BE RESCINDED

5160-4-22

Surgical services.

- (A) The department will reimburse physicians for most surgical procedures. The surgical procedure includes the operation per se, local infiltration, metacarpal/digital block or topical anesthesia when used, and the normal uncomplicated preoperative and postoperative care. Payment for conscious sedation is bundled into the payment for the related surgical or radiological procedure and is not reimbursed separately by the department.
- (B) Physicians will be reimbursed for physician visits in addition to the surgery only as detailed in rule 5160-4-06 of the Administrative Code.
- (C) For the reimbursement of surgical services, the physician must bill the appropriate code for the surgical procedure(s). Each surgical procedure must be billed using the most comprehensive surgical procedure code(s). This means procedures that are incidental to, or performed as an integral part of the comprehensive surgical service(s), must not be billed in component parts or "unbundled."
- (D) Multiple surgeries.
 - (1) Surgical codes subject to multiple surgery pricing are indicated in the appendix to this rule. Multiple surgery pricing will apply to the procedures indicated with an "x" in the corresponding column for multiple surgery in the appendix to this rule.
 - (2) Reimbursement for multiple surgical procedures performed on the same patient by the same provider shall be the lesser of billed charges or:
 - (a) One hundred per cent of the medicaid maximum allowed for the primary procedure.

The primary procedure is considered to be the surgical procedure that has the highest medicaid maximum listed in appendix DD to rule 5160-1-60 of the Administrative Code.
 - (b) Fifty per cent of the medicaid maximum allowed for the secondary procedure.
 - (c) Twenty-five per cent of the medicaid maximum allowed for all

subsequent (tertiary, etc.) procedures.

- (3) Surgical codes subject to multiple surgery pricing may not be billed with multiple units. Billing a multiple surgery code with more than one unit will result in a denial of that line. Each surgery subject to multiple surgery pricing must be billed on a separate line using the most comprehensive surgical procedure code.
- (4) Surgical procedure codes that are not considered multiple surgery and are not bundled into the reimbursement of another surgical procedure billed will be paid at the lesser of the billed charge or the medicaid maximum regardless of whether the codes are submitted with another surgical procedure indicated with an "x" in the multiple surgery column of the appendix to this rule.
- (5) The Ohio department of medicaid (ODM) allows the 51 modifier signifying a "multiple procedure."

(E) Bilateral procedures.

- (1) Surgical codes subject to bilateral surgery pricing are contained in the appendices to this rule. Bilateral surgery pricing will apply to procedures indicated with an "x" in the corresponding column for bilateral surgery in the appendix to this rule.
- (2) Bilateral procedures, when performed bilaterally, should be billed with the bilateral surgery code on a single line with the modifier 50.
- (3) The medicaid maximum for bilateral procedures is one hundred fifty per cent of the medicaid maximum allowed for the same procedures performed unilaterally when the code is billed on a single line with the 50 modifier.
- (4) Surgical codes that are considered bilateral codes but are performed unilaterally on only one side of the body should be billed on one line unmodified or on one line with either the LT or the RT modifier indicating the side of the body on which the procedure was performed.
- (5) Surgical codes that are considered bilateral codes but are performed more than once on one or each side of the body and/or body part indicated by the code definition must be billed using only the LT and RT modifiers on each line to demonstrate the procedure was performed more than once on one or each side.

(F) Surgical procedures that may be billed with site modifiers.

- (1) Surgical procedures performed on fingers, toes, eyelids, or coronary arteries may be billed with site modifiers. Procedures that may be billed with site modifiers are indicated with an "x" in the corresponding column in the appendix to this rule.
- (2) Surgical procedures performed on hands, feet, fingers, and/or toes may be billed modified or unmodified depending on the definition of the code and the site at which the procedure was performed. For example, if the code definition indicates the right thumb, the code defines the site of the procedure.
 - (a) Surgical procedures performed on only one body part, for example one finger or one hand, one toe or one foot, may be billed unmodified.
 - (b) Surgical procedures performed on more than one body part, according to the definition of the code, must be billed with the appropriate digit modifier for each finger or toe, and/or with the LT modifier for each left hand or left foot procedure, and/or with the RT modifier for each right hand or right foot procedure.
- (3) Surgical procedures performed on eyelids may be billed using eyelid modifiers. An eyelid modifier is required if the surgery involves more than one eyelid. If the surgery was performed on only one eyelid (right or left side), the code must be billed using the appropriate eyelid modifier. If the surgical procedure was performed on both eyelids of one eye on a side, the code must be billed using the LT or the RT modifier demonstrating that the surgery was performed on both eyelids of one eye on a side.
- (4) Surgical procedures performed on the coronary arteries may be billed using the appropriate coronary artery modifier to demonstrate which artery and side.

(G) Incidental procedures.

When incidental procedures are performed through the same incision, during the same operative session, the allowable fee shall be that of the major, more comprehensive, procedure only.

(H) Assistant at surgery.

- (1) Surgical codes subject to assistant at surgery pricing are contained in the

appendix to this rule. Assistant at surgery pricing will apply to procedures indicated with an "x" in the corresponding column for assistant at surgery in the appendix to this rule.

- (2) The billing by a surgical assistant shall be no greater than his/her customary charge for the professional work rendered.
- (3) The department's payment for an assistant at surgery will be limited to the billed charge, or twenty-five per cent of the medicaid maximum allowed for the primary surgical procedure, whichever is lower.
- (4) No assistant fees will be reimbursed for assistant-at-surgery services provided by a non-physician (e.g., registered nurses, advanced practice nurses, or physician assistants).
- (5) Reimbursement will not be made for more than one assistant at surgery, regardless of the extent of surgery.
- (6) Conditions for payment for assistants at surgery in a teaching hospital.
 - (a) Reimbursement will not be made for assistants at surgery in teaching hospitals with a training program relating to the medical specialty required for the surgical procedure and where a resident in a training program is available to serve as an assistant at surgery.
 - (b) Reimbursement for an assistant at surgery in a teaching hospital may be made only if the services:
 - (i) Are required due to exceptional medical circumstances;
 - (ii) Are performed by team physicians needed to perform complex medical procedures;
 - (iii) Constitute concurrent medical care relating to a medical condition that requires the presence of and active care by a physician of another specialty during surgery; or
 - (iv) Are medically required and are furnished by a physician who is primarily engaged in the field of surgery and the primary surgeon does not utilize residents and interns in the surgical procedure he or she performs (including preoperative and postoperative care).

(7) Billing assistant at surgery services.

For reimbursement, providers must bill the appropriate code for the primary surgical procedure modified by 80.

(I) Application of casts, splints, straps or other traction devices.

- (1) Services listed in the musculoskeletal surgery section of the current procedural terminology (codes 20000 through 28899 and 29800 through 29999) include the application and removal of the first cast, splint, strap or other traction device.
- (2) The casting, splinting and strapping procedures listed at the end of the musculoskeletal surgery section of the current procedural terminology (CPT) (codes 29000 through 29799) may be billed only when the casting, splinting or strapping is performed as a replacement procedure during or after the period of follow-up care. A visit may not be billed with any of the casting, splinting or strapping codes.
 - (a) The casting codes include all professional services and supplies provided during the service.
 - (b) The splinting and strapping codes do not include the splints or straps (elastic bandages). Splints or straps may be billed as a durable medical equipment (DME) service, if it was medically necessary to replace the splint or strap.
- (3) If a cast application, strapping or splinting is provided as an initial procedure in which no surgery code is applicable (e.g., the casting or strapping of a sprained ankle or knee), the provider must bill using the appropriate visit code. When this service is provided in a non-hospital setting, the provider may also be reimbursed for the cost of the cast, splint, or strap.
 - (a) For the strapping or splinting materials, the provider must bill the appropriate DME code in accordance with Chapter 5160-10 of the Administrative Code.
 - (b) For casting materials, the provider must bill the appropriate code for casting materials in appendix DD to rule 5160-1-60 of the Administrative Code. The provider must maintain, at a minimum, documentation that supports that the service was an initial cast application for a non-surgical service and the quantity and description

of the casting supplies.

- (4) When a cast has been damaged and it is medically appropriate to repair rather than to remove and replace the cast, the provider may bill and be reimbursed for an evaluation and management service. If the casting repair is performed in a non-hospital setting, the provider may also be compensated for the casting materials by billing one of the appropriate codes for casting materials.

*** DRAFT - NOT YET FILED ***

5160-4-22

Surgical services.

(A) Coverage.

(1) In general, payment may be made to an eligible provider for performing a medically necessary surgical procedure on an eligible recipient. The following limitations, however, apply.

(a) No separate payment is made to the provider of a surgical service for local infiltration, the administration of general anesthesia or sedation, normal uncomplicated preoperative and postoperative care, or any procedure that is performed incidental to or as an integral part of the operation. On claims, providers should report comprehensive surgical services; they must not itemize or "unbundle" individual components.

(b) Certain characteristics of a surgical procedure performed on the same patient by the same provider may affect how it is reported on a claim and how payment for it is made.

(i) The department recognizes four groups of surgical procedures defined by a particular characteristic:

(a) Multiple procedures, for which payment is reduced when more than one is performed;

(b) Bilateral procedures, for which payment is adjusted when they are performed on both body parts of a corresponding pair;

(c) Assistant-at-surgery procedures, for which payment is reduced when they are performed by an assistant at surgery; and

(d) Procedures performed on fingers, toes, eyelids, or coronary arteries.

(ii) In assigning procedures to these groups, the department follows the policies of the medicare program.

(2) The following constraints apply to payment for assistant-at-surgery procedures:

(a) No payment is made for more than one assistant at surgery, regardless of the extent of the surgery;

(b) Payment may be made for an assistant at surgery in a teaching hospital only if any of the following conditions is met:

- (i) The service performed is medically necessary, the physician who performs it is primarily engaged in the field of surgery, and the primary surgeon does not use residents or interns for any part of the surgical procedure (including preoperative and postoperative care);
 - (ii) The service constitutes concurrent care for a medical condition that requires the presence of and active treatment by a physician of another specialty during surgery;
 - (iii) Complex medical procedures are performed that require a team of physicians; or
 - (iv) Exceptional medical circumstances warrant an assistant at surgery: and
- (c) No payment is made for an assistant at surgery in a teaching hospital if the following two conditions are met:
- (i) The hospital has a training program in the medical specialty required for the surgical procedure; and
 - (ii) A resident in that training program is available to serve as an assistant at surgery.
- (3) Payment for the surgical treatment of obesity requires prior authorization.
- (4) Payment for physician visits in addition to surgery is addressed in rule 5160-4-06 of the Administrative Code.
- (5) Certain types of surgery are often supplemented by the use of a cast, splint, strap, or other traction device. For initial application and removal that is performed in conjunction with covered musculoskeletal surgery, payment for the surgery includes the application and removal procedures, all materials (casting components, splints, or straps), and incidental supplies. In all other circumstances, the following provisions apply:
- (a) Payment for the work depends on the nature and purpose of the procedure.
- (i) For initial application and removal that is not performed in conjunction with surgery (e.g., the casting or strapping of a sprained joint), payment may be made for an appropriate evaluation and management service;
- (ii) For necessary replacement, payment may be made for an appropriate casting/strapping procedure; and

(iii) For necessary repair, payment may be made for an appropriate evaluation and management service.

(b) Separate payment may be made for materials only if the service was rendered in a non-hospital setting.

(c) No separate payment is made for incidental supplies.

(B) Claim payment. Payment for a surgical procedure is the lesser of two figures:

(1) The provider's submitted charge; or

(2) A percentage of the amount specified in rule 5160-1-60 of the Administrative Code or in appendix DD to that rule, determined in the following manner:

(a) For a procedure that is not performed incidental to or as an integral part of an operation and that is not subject to multiple-procedure payment reduction, one hundred per cent;

(b) For a procedure that is subject to multiple-procedure payment reduction, the relevant percentage from the following list:

(i) For a primary procedure (i.e., the procedure with the highest maximum amount listed in rule 5160-1-60 of the Administrative Code or in appendix DD to that rule), one hundred per cent;

(ii) For a secondary procedure (i.e., the procedure with the next highest maximum amount listed in rule 5160-1-60 of the Administrative Code or in appendix DD to that rule), fifty per cent; or

(iii) For any other procedure, twenty-five per cent;

(c) For a bilateral procedure, one hundred fifty per cent; or

(d) For an assistant-at-surgery procedure, twenty-five per cent.
